About

Strong-minded, full-stack web developer with a passion for performance and scalability and with a flair for building elegant solutions for advanced platforms.

Helped with building the online supermarket (Rema1000's) entire solution for shared economy between its users and shoppers called ViGo.

Skills

Laravel, PHP, Git, Github, CI/CD, REST, Vue.js, React, PHPunit, automatic tests, web security, exploits, vulnerabilities, APIs, MySQL, MariaDB, AWS, CLI, Javascript, Typescript, Servers, Jira, jQuery, Slack, PhpStorm, Cordova, Android Studio, xCode, Mac, Performance, NoSql, Sqlite, Firebare, Gitlab, Bitbucket, Redux, Vuex, Next.js, Documentation, Bugreporting, Testing, NPM, Composer, Cloud, Database Replication, Docker, Open source, Stripe, Payment Gateway, Paypal, TailwindCSS, Serverless, Redis... among others

Achievements

I passed the screening interviews and coding tests for Toptal, and can now call me a top 3% software developer according to them.

Laravel

Due to the many years I have contributed to open source projects in my spare time, I have become a bit known in the Laravel community.

Employment

Feb 2017 - Present

CEO & Developer at Ulties

Since I started my own company back in 2017, which I run in my spare time next to my full-time job at Novasa Interactive ApS I've worked on many new and exciting projects from basic WordPress solutions to advanced SaaS applications.

I've had the opportunity to work on projects for many different companies among which Red Barnet Ungdom, Essencius A/S, FysioDanmark, HP Danmark, Envato, ALSO, Danske Hospitals Klovne, Pangaea Network Limited, Worksome, FuseTea, TicketCharlie and many more.

Besides that, I have also gained a lot of experience in project and company management as well as with invoicing and accounting.

Mar 2014 - January 2021

Software Developer at Novasa Interactive ApS

At Novasa Interactive ApS I have been the lead backend developer since my second year. There I have had the responsibility to ensure all servers and platforms are running smoothly.

I have been a part of building solutions like Copenhagen Airport, Puzzible, Rema1000 and Vigo.

Education

January 2012 - November 2013

Web Integrator (Main Course) at Roskilde Tekniske Skole & Københavnsk Tekniske Skole

The basic course was at Københavnsk Tekniske Skole and the main course was at Roskilde Tekniske Skole. I knew everything that we were being taught at school, which is why I delivered every assignment as fast as possible and used the spare time to teach myself how to build more advanced and complex systems using a variety of different frameworks.

After graduating at the top of my class, I become an assistant teacher at the school for a few months until I got the job at Novasa Interactive ApS.
